SMART PHONE COMPATIBILITY

Beantech Watches are designed to work with either iPhone or Android phones.

iPhone – ENGAGE S1 & S1 PLUS watches will interface with iOS 7.1 or higher and model 5S or newer. To determine your phone's software version, go to Settings > General > About.

Android phones – ENGAGE S1 & S1 PLUS watches will interface with Android 4.4 or higher. To check your Android version, go to Settings > About Device.

WHAT'S INCLUDED

POWER & SLEEP FUNCTIONS

Turn Watch ON - Press and hold the Power / Function button on the side of the watch until the "b" logo appears on screen.

Turn Watch OFF - Press and hold the Power / Function button until the "b" logo disappears. The watch will now shut down.

Turn Screen ON or OFF - If the screen is dark, tap the Power / Function button to turn it on. Likewise, if the screen is on, press the Power / Function button to turn it off.

NAVIGATING ENGAGE S1 & S1 PLUS

Apps on the ENGAGE watch are arranged by category into a series of screens. Each Apps screen contains 3-4 Apps. While viewing clock, Swipe left or right, or up or down to access Apps screens. Swipe left or right to change Apps screens. Within Apps, swipe to the directions of arrows to access various levels. To return to clock, swipe up or down. Exit apps back to Apps screens by swiping right to left.

IMPORTANT - SYNC PROCEDURE

1. First, Bluetooth SYNC S1 watch with your smart phone. On the watch go to **Settings > BT Settings** and turn "**Power**" & "**Visibility**" both ON. Then turn the bluetooth on your phone to ON. Now pair the devices.

Note: If pairing doesn't occur, go to **BT Connection** app on watch, enter and tap "**Search for new device**". Select your phone when it appears then accept the connection in your phone.

2. Download App – On your phone, go to the Apple App Store or the Google Play Store, depending on your phone type, search for "**Beantech Watch**" and download.
3. Register and Log in on the app - Click the "**Register**" tab and follow the instructions. Then Sync the app using the following procedure.

Note: Password can consist only of letters & numbers and must be a minimum of 6 characters long.

BLUETOOTH SYNC TO PHONE

STEP 1

iOS & ANDROID

← Turn Bluetooth ON in the phone.

STEP 2

On the watch, open the **Settings** App.

Then turn **POWER & VISIBILITY** both to ON.

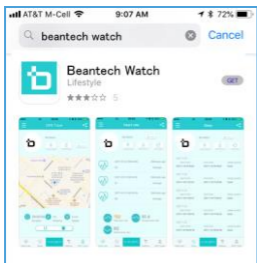

Note: For most Android devices you will need to pair through the **BT connection** APP on the watch.

Open **BT connection** APP and tap **Search for new device**.

Select your phone when it appears, then accept the sync on your phone.

APP SYNC FOR IPHONE

STEP 8

ANDROID

Then the App appears

INPUT PERSONAL DATA

First select from Metric or Imperial (US Standard) format. On the watch, go to Settings > Units, then select Metric or Imperial. Next enter the Pedometer app on the watch and select Options. Enter your daily goal, height and weight. Tap ✓ after each entry. The app will auto update this at next use.

Note: Personal Data in Imperial format will be a close approximation. This will not affect your history or statistics.

IMPORTANT NOTES

1. In most instances the default setting on your phone will block emails to come through to the watch. You will need to go to phone settings and allow for notifications in the general email app and you will also need to enter each email account and select "Show in Notification Center" and adjust related settings on this screen to your desire.
2. Typically, text messages occur immediately to the watch upon syncing the app as this is the default setting on most phones. If you do not receive texts on the watch after syncing, try first to go to phone settings and allow notifications in the general messaging app.
3. Your watch will immediately issue notification alerts upon syncing. This may be an appropriate time to set your alert sound and volume preference. Enter Settings app on the watch and go to Sound. Select from vibrate to other audible alert sounds. Then go to Volume and adjust to your preference.

Now is also a good time to review how many apps you wish to receive notifications from. In the phone you will need to go the notifications within each app and choose.

CHARGING ENGAGE S1 & S1 PLUS WATCH

To charge, placed the watch into the cradle and make sure the contacts on the back of the watch align with the contacts in the cradle. Connect the Large end of the USB charging cable to the AC Adapter, and the small end into the port on the cradle. Plug the AC adapter into an AC outlet.

Note: for portable convenience, ENGAGE Watch can charge from a powered USB port without the use of the AC Adapter.

IMPORTANT

Contacts on watch must have a good connection with contacts on charging cradle. Be sure to firmly seat watch into cradle when charging. Charging confirmation indicator will appear on watch screen upon making the connection.

MANAGING AUDIO WITH PHONE CALLS

When making or receiving phone calls you may choose to direct the audio to your phone or to S1 watch. Answer and place phone calls from S1 watch.

Android

To receive the call on watch:

1. Go to bluetooth settings in your phone for the S1 watch and turn Call Audio and Media Audio both on.

To receive calls on the phone:

1. Option one is to turn off bluetooth on the phone.
2. Option two is to enter bluetooth settings in your phone for S1 watch and turn Call Audio and Media Audio off.

iOS

For iPhone, you may select where to take each call from the caller ID screen.

Tap audio

Then select where you want the audio to go through. You can perform this action with each call.

Tap to make your selection →

You can also select for permanent call direction as follows:

1. Swipe up from the bottom edge of the screen to reveal quick access menu.
2. Then hard press and hold the Music Control Panel until it enlarges to reveal more controls.

On the Music Control menu, tap the up arrow at the top right of the menu to open choices for audio control.

Tap here

Select iPhone, Speaker or S1. Note if you select iPhone you may choose from speaker or connected devices such as headphones from the call screen during a call.

Tap here to select

Tap screen (away from menu), then swipe the menu down off the screen when finished.

OPERATION WITH BLUETOOTH SPEAKERS (FOR S1 PLUS ONLY)

S1 PLUS Smart Watch can interface through bluetooth headphones / speakers giving added convenience and benefit. S1 PLUS can watch can connect from the watch directly to an external bluetooth device such as bluetooth speakers or headphones. This allows you to play music loaded on the watch while away from your phone. S1 PLUS can also play music loaded on your phone through bluetooth speakers / headphones. Follow the following procedure to connect to bluetooth speaker / headphone.

Connect to Bluetooth device directly from ENGAGE S1 PLUS

1. Insure ENGAGE S1 PLUS is not connected to the phone.
2. On the watch go to Settings > BT settings and make sure Power and Visibility are both turned On.

Tap to turn
Power and
Visibility
on

3. Put your bluetooth speaker or headphones into pairing mode.
4. On the watch, enter the BT connection app.

Tap to enter

5. Then select Search for New Device. The bluetooth speaker will appear, then select it.

Tap to select

Connected indicator appears

CONNECT TO BLUETOOTH DEVICE THROUGH PHONE

This allows you to direct audio from all phone connected applications to the wireless speaker / headphones. With this connection you can direct the audio for functions such as making phone calls or listening to music loaded on your phone through the wireless bluetooth speakers / headphones.

1. **IMPORTANT:** Make sure watch is connected to phone first.
2. Now pair the bluetooth speakers / headphones as outlined in the previous section. If they are already paired, be sure to connect the watch to the phone first or you will not be able to interact with the watch correctly.
3. Then connect the bluetooth speaker / headphones.

ENGAGE S1 & S1 PLUS FREQUENTLY ASKED QUESTIONS

1. Watch will not turn ON.

Check the connection when charging. Please check for secure connections. Also insure the watch is fully seated in to the charging cradle.

2. How to change the clock style?

Go to Settings > Clock > Clock type; swipe left or right to view available styles, then select OK for your choice.

3. How to change background theme?

Go to Theme App, Select Theme 1, Theme 2 or Theme 3.

4. Having trouble pairing Bluetooth with smart phone.

Be sure Bluetooth power is ON in Watch. Go to Settings > BT Settings >. If Power shows OFF, tap to turn to ON. Make sure Bluetooth is ON in smart phone.

5. How to change ringtone and alert types?

Go to Settings > Sound, then select desired function and make your choice.

6. How to change audio volume of ENGAGE smart watch?

Go to Settings > Volume > Multimedia, then either increase or decrease.

7. How to turn Watch display ON by moving your wrist?

Go to Settings > Motion, then select from available options.

8. How to synch time on ENGAGE smart watch?

Go to Beantech Watch App on smart phone. Make sure Bluetooth is connected from the Watch to the App. From the App Home Page, tap sync data icon in upper right corner.

9. I'm not getting texts on the watch.

First insure the Messaging app is set to allow notifications. Note: texts appear in Remote Notifier when paired with iPhone and appear in Messages app when paired with Android phone.

10. The time isn't syncing.

This indicates you are not fully synced to the App. Be sure to follow the procedure outlined accurately. You may also view our videos provided within the app.

11. How do I regulate which notifications I receive on watch?

ENGAGE S1 smart watch will receive all notifications that your smart phone receives. If you wish to adjust these, you will need to make the adjustments from your phone.

 **BEANTECH**
